| Date       | Staff       | Notes  |
|------------|-------------|--|
| 10/20/2023 | Jacobi, Tim | Troubleshoot problem with rogue DHCP server on network, which put the workstations into another subnet. Inhouse tech found the device and brought it offline. Began initial data dump from the camera server to the NAS.   |
| 10/23/2023 | Jacobi, Tim | Repaired a permissions issue that was not allowing videos to copy to the NAS from the CameraServer.  |
| 10/24/2023 | Jacobi, Tim | Worked with WatchGuard tech support on moving files. I attempted to move video files manually, but was concerned about indexing and the ability of the software to find the correct video when looking for or at the videos. This was corroborated by the technician who stated that the only way this could occur was with an iSCSI connection to the NAS. I setup the iSCSI target in the Synology NAS device and setup the initiator in the virtual camera server. Created the connection and NAS was able to be accessed as a local drive on the server. I logged into the WatchGuard software and setup a new connection to the NAS via the iSCSI protocol.   |
| 10/25/2023 | Jacobi, Tim | Assisted inhouse technician with monitoring and helping with the file transfer. It appears that the physical continues to fill up as files are being imported as well as being exported to the NAS via the camera server Watchguard software. I found that this VHDx is a dynamically expanding file. It will expand to the limit of the physical allocation, however it will not shrink as the data is moved from it, but will need to be compacted at a designated time to regain the physical space for the host server.  |
| 10/26/2023 | Jacobi, Tim | The host server was dangerously low on disk space in the D partition. The server rebooted and no virtual servers came up. I found that the VSS writer for Hyper-V was in a waiting state. I restarted this service but it remained in the waiting state, and showed all three VMs backing up. I got into the Cove backup system and found that it was attempting to backup. I stopped this, as there was an error and the lack of drive space was causing problems with the backup. This cleared the wait state for the VSS process and stopped the VMs from their backup state. The server was rebooted and the BDC and SQL server was launched successfully. I then performed a edit on the VHDx for the watchguard server. I performed a compact task on the drive and this regain about 490 GB of space for the physical drive of the D partition. The camera server was launched successfully. Because of the simultaneous importing of video and offloading of video the physical space began to diminish once again. Another compact task will be implemented tomorrow morning. |
| 11/02/2023 | Jacobi, Tim | Remoted into the host server and performed a compact on the VHDx file for the camera server while demonstrating the procedure to the in-house technician.  |

## Cybersecurity Course Enrollment Form for Counties

---

Texas Government Code § 2054.5191 requires all county employees, elected officials, and appointed officials who have access to a local government computer system or database and use a computer to perform at least 25 percent of their duties to complete an annual cybersecurity training that has been certified by the Texas Department of Information Resources (DIR).

In response to the cybersecurity training mandate and in furtherance of our continued commitment to our county family, TAC is offering a cybersecurity course that has been certified by DIR and fulfills the requirements of the law. This course is available to counties for an annual fee of \$5 per user.

Should your county choose to participate in TAC's cybersecurity training program, **please have your Commissioners Court approve your county's participation and complete the enclosed form and return it via email to [SecurityTraining@county.org](mailto:SecurityTraining@county.org) or fax to (512) 477-1324.** For more information about the underlying legislation and TAC's cybersecurity training course, please visit [county.org/cybersecurity](http://county.org/cybersecurity).

Your course administrator will receive an email notification when your county is enrolled. Counties are required to report their compliance with the mandate by August 31, 2024. Enrollment is available on a rolling basis through July 31, 2024.
